

Ceiling Insulation and Ductwork Sealing

If we can access your attic, we'll check your ductwork and insulation. Ductwork with holes and tears cost you money. We will inspect and seal all leaks.

Low levels of insulation let air escape through your ceiling. We'll add the proper level of insulation.

Let us help you save money with an energy-efficient home. Call today and see if your home is located in one of several communities that qualify for our Neighborhood Weatherization Program.

SAVE ENERGY – SAVE MONEY
**Our energy experts are
ready to make your home
more energy efficient.**

Qualifying homes can receive all measures at no cost. If your home does not qualify, you can still receive a FREE Home Energy Audit.

ENERGY-SAVING PRODUCTS

If your home is located in one of several communities that qualify for our Neighborhood Weatherization Program, we'll perform a free Energy Audit and help you install an energy-saving kit that includes:

Bubble Spray Bathroom Aerator

This bathroom faucet aerator is designed to accommodate most sink faucets. It saves money on water and energy by producing forceful streams at a reduced flow rate that minimizes the amount of energy needed to heat hot water.

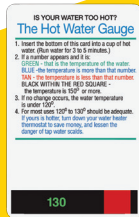

Acrylic Caulk

This product is designed for sealing areas that cause air leaks. It has an acrylic adhesive sealant ideal for use in sealing interior and exterior windows and doors, trim, sinks, counters and a variety of substrates.

Hot Water Gauge

The hot water temperature card allows you to test your hot water temperature. Keeping hot water within recommended levels helps save energy and prevent burns.

Hot Water Pipe Insulation

Insulating hot water pipes reduces heat loss. The insulation is energy efficient, flexible and is 100% pre-slit for easy installation.

Showerhead

The Earth® showerhead helps you save money on your energy bill, and you're less likely to run out of hot water while showering.

Air Filter Whistle

A clogged or dirty air filter can rob your home of energy efficiency. The Air Filter Whistle easily attaches to a new air filter and sounds when your filter becomes 50% clogged letting you know it is time to replace the filter. The Air Filter Whistle is reusable.

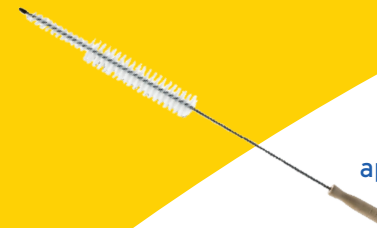

9 Watt LED Light Bulb

This dimmable LED light bulb provides 25,000 hours of service, lasting 15 times longer than incandescent bulbs. It is energy efficient, using up to 80% less energy than a standard light bulb.

Plate Pal™

The Plate Pal™ wall plate thermometer monitors temperatures in homes or offices with an easy-to-read temperature display. The wall plate can replace existing wall plates and it does not require wiring.

Refrigerator Coil Brush

Help improve the energy efficiency of your appliances – and extend their life – when you regularly brush the coils and fans.

Weatherstripping

The doors and windows in your home can allow air leaks even when they are closed. Weatherstripping your doors is easy, and it can keep energy costs down.
